

Kenworth T300-1 TRUCK

FOR SALE

- The truck body is equipped with 2 – 1140 litre manufactured tanks by BIEOX in Quebec. These are the system benchtop models that serve the purpose of a tank and workbench. The body is fully set up for a compressed air that includes filters and water separators. The body is wired for shore power in 220V, 110V and 12V and include a brand new Thermo King heater, 110V wall and ceiling heaters and 12V heaters. There are lights on the body, inside and out.
- The body is equipped with an aluminum boarding step that folds away for travelling.
- The truck has been very well maintained and is in excellent condition inside and out. The interior including the door panels, headliner and seats are like new.
- The PAACAR 6 cylinder turbocharged engine starts and runs well, and is fitted with an engine brake.

Photo showing the truck and Odometer. (note the Thermo King heater and 3 aluminum roll-up doors.)

Engine Compartment and hour meter reading.
